

Club opening incentive program

We have set a new standardized reimbursement rate of 20 percent of the new-club fees paid from the new club for members at the time of chartering.

This means 20 percent of the monies from the new club will help defray the expenses incurred in opening the new club. This applies to Kiwanis clubs opened around the world.

NOTE: The appropriate payment will be issued to the district office on a quarterly basis for distribution to the appropriate club opener(s) indicated on the New-club information sheet. Payment is made when the club charters and Kiwanis International has received all required paperwork and fees. Only one reimbursement will be issued per club.
